

Patient Monitoring Card

LARIAM® 250mg (mefloquine)

*This card informs you about the importance of certain possible side effects with **LARIAM®**.*

*Also read the Patient Leaflet included in the box – this gives you the full information about **LARIAM®**.*

Keep this card with you at all times during treatment.

Present this card to every doctor you see.

LARIAM® may cause neuropsychiatric disorders that may have serious consequences in certain patients:

- *unusual behavior or unusual change in mood*
- *bad dreams*
- *confusional state*
- *disturbance in attention*
- *depression*
- *severe anxiety or panic attacks*
- *agitation, nervousness, aggression (new or worsening feeling of anger)*
- *suicidal ideation or self-endangering behavior*
- *feeling of mistrust towards others (paranoia)*
- *psychosis (losing touch with reality)*
- *seeing or hearing things that are not there (hallucinations).*

Please seek physician advice immediately if you experience any of these problems and do not continue LARIAM® treatment without physician agreement.

Carte de surveillance patient

LARIAM® 250mg (méfloquine)

Cette carte vous informe de l'importance de certains effets indésirables possibles avec **LARIAM®** qui doivent vous conduire à consulter un médecin.

Lisez également la notice incluse dans la boîte – elle vous donne une information complète concernant **LARIAM®**.

Conservez cette carte sur vous durant votre traitement.

Présentez cette carte lors de chaque visite médicale.

For the other side effects with LARIAM® including preceding signs of some potentially serious side effects, please refer to the Patient Leaflet included in the box.
